EMI supplies training services to clients of all types including private homeowners, the military, governmental agencies, and oil companies.

EMI's training experience includes: asbestos identification and removal; hazardous waste handling, transportation and remediation; lead inspections, assessments, and abatement; radiation worker and surveyor training; underground storage tank installation and removal; confined space; explosive waste reconnaissance; scaffold safety and fall protection; first aid and CPR; and other client specific training.

**Program Description, Cost and Length**

**Hazardous Waste Operations and Emergency Response:**

This 40 hour seminar is designed to meet the training requirements of OSHA 29 CFR 1910.120, and includes pertinent information from the EPA 40 CFR. This course ensures each student has a thorough understanding of the potential hazards to health and safety associated with site cleanup and emergency response. The seminar covers basic information through lectures, films, and hand-on workshops. Students also learn how to use personal protective equipment and air monitoring instruments, toxicology, medical surveillance, decontamination, emergency response planning, confined space entry and spill containment.

Length: 40 Hours

Cost: \$525.00

**Hazardous Waste Operations and Emergency Response Refresher:**

This seminar is designed to meet the annual 8 hour Hazardous Waste Operations and Emergency Response refresher training requirements of OSHA's 29 CFR 1910.120. This course reviews potential hazards to health and safety associated with site cleanup and emergency response. Students will also be briefed on state and federal regulatory changes.

Length: 8 Hours

Cost: \$130.00

**Supervisor of Hazardous Waste:**

This seminar offers specific supervisory information for those individuals managing crews that hold the basic 40-hour HAZWOPER certification. Topics include the additional responsibilities of a hazardous waste operations supervisor, paperwork requirements, logistics of directing crews, etc. Classes will be tailored to meet the needs of the participants and are open to anyone currently holding a HAZWOPER 40-hour ID card or certificate.

Length:

Cost: \$145.00

**Asbestos Abatement Certification for Contractors and Supervisors:**

This seminar meets the requirements of the State of Alaska Department of Labor (DOL 8 AAC 61.600-790), Occupational Safety and Health Administration (OSHA 29 CFR 1910, 1915 and 1926) and the Environmental Protection Agency (EPA/AHERA 40 CFR Part 763 subpart E). It covers the basics of asbestos abatement work through lectures, films, and hands-on workshops. This certification is required for all workers, contractors and supervisors, and recommended for health and safety professionals, maintenance and custodial personnel, school administrators, engineers, and project managers in the asbestos field.

Length: 40 Hours

Cost: \$595.00

**Asbestos Abatement Refresher**

This 8 hour seminar is open to anyone who needs to refresh or renew their State of Alaska Asbestos Certificate.

Length: 8 Hours

Cost: \$130.00

#### EPA/AHERA Project Design Training

This 24 hr. seminar is open to anyone desiring training in the fundamental technical information related to asbestos abatement project design that can be incorporated into written specifications. This course will serve as a technical supplement on asbestos work practices recommended for project designers, school administrators, maintenance personnel, asbestos coordinators, engineers, project managers and project monitors. Includes a building walk through, survey and a design workshop.

Length: 24 Hours

Cost:

#### EPA/AHERA Project Design Refresher

This 8 hr. seminar is open to anyone desiring refresher training in the fundamental technical information relating to asbestos abatement project design that can be incorporated into written specifications. This course will serve as a technical supplement on asbestos work practices recommended for project designers, school administrators, maintenance personnel, asbestos coordinators, engineers, project managers and project monitors.

Length: 8 Hours

Cost: \$215.00

#### EPA/AHERA Inspector Training:

This 24 hr. seminar is open to anyone desiring training in identification, inspection, sampling, and assessing asbestos materials in buildings. It is required for all AHERA inspectors and management planners, and is recommended for project designers, school administrators, maintenance personnel, asbestos coordinators, engineers, project managers and project monitors. Includes hands-on training and a field trip.

Length: 24 Hours

Cost: \$430.00

#### EPA/AHERA Inspector Refresher:

This 4 hour seminar is open to anyone who needs the EPA/AHERA Inspector Annual Refresher course. It is required for all EPA/AHERA Inspectors.

Length: 4 Hours

Cost: \$195.00

#### EPA/AHERA Management Planner Training

This 16 hr. seminar is open to any person certified as an EPA/AHERA Inspector. It is also required for all AHERA management planners, and is recommended for project designers, school administrators, maintenance personnel, asbestos coordinators, engineers, project managers and project monitors.

Length: 16 Hours

Cost: \$330.00

#### EPA/AHERA Management Planner Refresher

This 4 hour seminar is open to anyone who needs the EPA/AHERA Management Planner Annual Refresher course. It is required for all AHERA Management Planners.

Length: 4 Hours

Cost: \$195.00

#### Hazardous Material Transportation:

This 16 hour seminar meets the training requirements of 49 CFR Parts 172.700-704. It is designed for those with responsibilities for preparing Hazardous Materials and Wastes shipments by air, water, highway, or rail transportation.. Classroom material reviews classification, preparation of shipping papers, packaging, marking, labeling, compatibility and load segregation. Hands-on training includes preparation of multi-modal shipping documents, packaging, and load compatibility.

Length: 16 Hours

Cost: \$370.00

#### Hazardous Materials Transportation – 8 Hours

This 8 hour course meets the requirements of 49 CFR Parts 172.700-704 and Part 175.20. It is designed for those persons having responsibility for preparing limited types of HAZMAT and bio-hazardous shipments by air, on IATA and non-IATA carriers. Class material covers the classification, preparation of shipping papers, packaging, marking, labeling, compatibility and load segregation. Hands-on training includes preparation of multi-modal shipping documents, packaging, and load compatibility.

Length: 8 Hours

Cost: \$185.00

#### Confined Space Entry Training

This 14 hour seminar meets the requirements of the State of Alaska Department of Labor (8 AAC 61.010 01.1401), OSHA 29 CFR 1910 146 & 147), and ANSI standards Z117.1-1989. It covers the basics of confined space work through lectures, and videos. This training is required for all confined space workers and attendants.

Length: 14 Hours

Cost: \$170.00

#### Asbestos Awareness

##### Air Monitoring for Asbestos

This 16 hour seminar provides training in air monitoring strategies and practices, covering EPA/AHERA regulations and safety procedures. It is recommended for all asbestos abatement supervisors, consultants, school and government agencies involved with air monitoring for asbestos projects. Recommended as a prerequisite for the NIOSH 582 "Sampling and Evaluating Airborne Asbestos Dust" Seminar.

Length: 16 Hours

Cost: \$250.00

##### Asbestos Operations & Maintenance Training

This 16 hour course meets the requirements of Federal OSHA 29 CFR 1926.1101 (Formerly 29 CFR 1926.58) and EPA 40 CFR 763.92 for O&M training. This seminar covers the basics of asbestos for Operations and Maintenance activities through lectures, videotapes, and slides. This training is required for all maintenance personnel engaging in Class III work.

Length: 16 Hours

Cost: Contract

##### Hazardous Painting Certification

This course meets the requirement of the Alaska Department of Labor (DOL) for certain painters to obtain a hazardous painting certificate. According to 08 AAC 061. 800 persons who perform hazardous painting operations must attend an approved 16 hour course and obtain a certificate from the DOL. Renewal courses (8 hour) and certification are required every 3 years thereafter. The course provides instruction on the health and safety hazards of typical paint operations; engineering controls, work practices and PPE. Hands-on training consists of qualitative fit tests, setting up push-pull ventilation and using air flow measurement
